## SUMMARY

Back-End Developer with hands-on experience in building APIs and web-based systems using Spring Boot. Skilled at integrating cloud-based solutions and optimizing backend performance. Passionate about learning new technologies — currently exploring Golang to deepen understanding of backend architecture and scalable system design. Eager to contribute to projects that emphasize clean architecture, efficiency, and innovation.

## WORK EXPERIENCE

### IT Software Developer | Internship – PT Bank Syariah Indonesia Tbk

Sep 2024 – Mar 2025 | Yogyakarta, Indonesia

- Contributed to the development of a web-based project monitoring system for the Wholesale & Office Automation (WHA) Department, increasing project visibility and tracking efficiency by 30%.
- Developed secure RESTful APIs using Spring Boot, implementing API Security measures such as authentication and authorization to ensure safe and efficient data handling.
- Designed and documented API contracts, data flow diagrams, and system architecture to support maintainability and scalability.
- Collaborated with QA engineers to debug, test, and optimize system performance using Postman, improving feature stability and reducing reported bugs by 15%.

### Cloud Computing | Apprenticeship – Bangkit Academy

Feb 2024 – Jul 2024 | Bandung, Indonesia

- Collaborated with cross-functional teams to develop a nature tourism guide app for Malang Raya, integrating mobile, machine learning, and Google Cloud services.
- Built and deployed REST APIs using Express.js and Axios, enabling seamless communication between ML models and mobile app services.
- Implemented CI/CD pipelines with GitHub Actions, utilized Docker and Cloud Run to containerize and deploy backend services, reducing deployment time from hours to under 15 minutes.
- Gained practical experience in cloud architecture, API integration, and scalable cloud deployment workflows.

## EDUCATION

### Universitas Islam Indonesia – Yogyakarta, Indonesia

Oct 2025

Bachelor Degree of Informatics

GPA 3.66/4.00

## CERTIFICATIONS

### Google Cloud Computing Foundations Certificate – Coursera

Apr 2024

### The Bits and Bytes of Computer Networking – Coursera

Feb 2024

### System Administration and IT Infrastructure Services – Coursera

Feb 2024

## SKILLS

**Programming Language:** Java, JavaScript, Golang

**Frameworks:** Spring Boot, Express.js

**Databases:** MySQL, SQL Server, Firestore

**Tools:** Google Cloud Platform (GCP), Docker, GitHub Actions

**Soft Skills:** Communication, Collaboration, Teamwork, Problem-solving, Flexibility, Adaptability

## LANGUAGES

Indonesia (Native), English (Professional)
