SUMMARY

IT Fresh Graduate and Back-End Developer with hands-on experience in designing and building RESTful APIs using Spring Boot. Experienced in backend system development, database integration, and cloud-based services to support scalable web applications. Currently focusing on backend development using Golang to deepen knowledge of backend architecture and high-performance system design. A collaborative problem-solver focused on delivering efficient, reliable, and maintainable backend solutions.

RELATED EXPERIENCE

PT Bank Syariah Indonesia

Yogyakarta, Indonesia (On-site)

IT Software Developer (Internship)

Sep 2024 – Mar 2025

- Developed a web-based project monitoring system for the Wholesale & Office Automation (WHA) Department, improving project visibility and tracking efficiency by 30%.
- Built secure RESTful APIs using Spring Boot, implementing authentication and authorization mechanisms to ensure safe and efficient data handling.
- Designed system architecture and authored technical documentation, including API contracts and data flow diagrams, to support scalable and maintainable development.
- Collaborated with QA engineers to debug, test, and optimize system performance using Postman, reducing reported bugs by 15%.

ADDITIONAL EXPERIENCE

Bangkit Academy

Bandung, Indonesia (Remote)

Cloud Computing Cohort (Apprenticeship)

Feb 2024 – Jul 2024

- Collaborated in a cross-functional team to develop a nature tourism guide application for the Malang Raya region, integrating mobile, machine learning, and cloud services.
- Built and deployed RESTful APIs using Express.js to enable communication between machine learning models and mobile application services.
- Implemented CI/CD pipelines with GitHub Actions and deployed containerized backend services using Docker and Google Cloud Run, reducing deployment time from hours to under 15 minutes.

EDUCATION

Universitas Islam Indonesia

2021 - 2025

Bachelor of Informatics, GPA 3.66/4.00

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Golang

Frameworks: Spring Boot, Express.js

Databases: MySQL, SQL Server, PostgreSQL, Firestore

Cloud & DevOps: Google Cloud Platform (GCP), GitHub Actions, Docker

FEATURED PROJECTS

- [mono-project](#) - RESTful API for project monitoring built with Golang (monolith architecture), supporting task tracking and reporting.
- [e-wallet](#) - Golang-based RESTful API for a digital wallet system.
- [chat-api](#) - RESTful API for a chat system built with Golang, message handling, and conversation.
